Xtreme Talk

Year 2016 has proven to be busy and fruitful so far. BSRM has earned several successes. The greatest achievement covered in this issue is, winning the Prestigious Presidents Award where, BSRM won the first place under the Large Industry Category. A day before winning the award, the Annual General Meeting of BSRM Limited and BSRM Steels Limited were successfully conducted. With effective seminars and workshop discussions in various points of the country, much work has been done to promote the new high strength and specialized steel brands of BSRM. A partnership of BSRM CSR with the UNDP to support ultra poor women in rural areas has also created a greater scope to make better changes.

It's time to refresh and get into work with a new zeal and conquer the challenges taken for the year. Let us begin the second half of 2016 with the hope that it will be equally productive or more. Wishing everyone a happy Ramadan!!

BSRM wins the President's Award

BSRM has been honored with the prestigious "President's Award for Industrial Development 2014". The awards were given in 5 different categories; large industry, medium industry, small industry, cottage industry and Hi-tech industry. BSRM won the first place in the Large Industry Category. This award was an appreciation for the company's contribution to the economy through industrial developments.

Workshop on Grade-80 Maxima with BCL

BSRM and BCL jointly organized a workshop on **“The case for Grade 80-the quest for more economy in steel use and greater safety in performance”** on March 28th, 2016 at BCL office, Uttara, Dhaka. A summary of code provisions regarding the use of reinforcements of various grades and the design challenges for using high strength rebar in structural concrete relevant to Bangladesh’s context were presented.

Mr. M. Firoze, BSRM Head of Marketing & Product Development and the keynote speaker, explained how this high strength steel can provide more safety to special projects and provide economy at the same time.

Seminar on “Reinforced Concrete Construction & Quality control”

BSRM organized a seminar on **“Reinforced Concrete Construction & Quality control”** in Barisal on 5th April, 2016. Engineer Abdul Malek Sikder, Additional Chief Engineer (Retd.), PWD, was the keynote speaker for the event. The purpose of the seminar was to provide people with a viewpoint of Reinforced Cement Concrete (RCC).

Seminar on “Good Construction Practices with Ductile Reinforcing Steel”

BSRM organized a seminar on “**Good Construction Practices with Ductile Reinforcing Steel**” in Khulna on 20th April, 2016. One of the prominent Structural Engineer of Bangladesh, Prof. Dr. Shamim Z. Basunia, also the immediate past president of IEB, was the leading speaker of the event. He shared his valuable knowledge and insight regarding Reinforced Cement Concrete (RCC) construction.
